Learn at your own pace - presentations provided online so no valuable practice time lost to attend lectures.

Also eight days clinical training – with patients provided

Geared towards the Diploma in Implant Dentistry at RCS Edinburgh

A growing network of clinical centres throughout the UK & Ireland – experience the benefits of having a local mentor

Cutting edge Blended Learning producing a portfolio of evidence of education and training for each student

“In my hands on surgical experience under the expert eye of Scot Muir through SmileTube were first class. A brilliant relaxed atmosphere to give me time to learn the techniques required to undertake my first surgical implant cases. Support from Lynda at Nobel Biocare and the very knowledgeable staff at SCED made it a great experience. Thanks to all.”

Dr Robbie Martin BDS September 2015

“The flexibility of doing the theory on-line has been fantastic. Far more convenient and cost effective than other courses. And it’s useful to be able to revisit a lecture. Having patients provided and having a relatively local mentor has also been a big advantage over many other courses.”

Dr Lucy Nichols BDS MFDSRCS MSc.
(comesthetic dentistry) Sept 2015.

“Great news, just got the results to the exam. (RCS Edin Diploma in Implant Dentistry). I managed to pass somehow! Absolutely delighted. Just to let you know to pass the written and the OSCE parts all I did was use your notes printed out which I had annotated as I went through them online, so thank you very much. I’m delighted to have a formal qualification behind me going forward.”

Dr Alec Granville BDS MFDS RCsed. Sept 2015
DESIGNED around the Diploma in Implant dentistry at the Royal College of Surgeons in Edinburgh the UIYC offers a blended learning approach. Why spend valuable time away from practice to attend lectures when you can do so at your own pace in your own space. However there is no substitute for clinical experience and this is the other side of the blended learning experience. Patients are provided for you to assess, treatment plan and treat in the clinical training centre of your choice under the supervision of some of the most experienced Implantologists in the UK.

The programme was developed by Dr Ken Nicholson BDS, MSc(Imp.Dent). Dr Nicholson brings over a decade of experience in teaching and practicing implant dentistry to the course. He was instrumental in the development of one of the first GDC registerable part-time MSc programmes in implant dentistry at the University of Warwick.

Dr. Scot Muir, your clinical supervisor in Scotland, graduated from Glasgow Dental Hospital in 1996, Scot furthered his career taking an interest in both cosmetic and implant dentistry. He he completed an MSc. in implant dentistry in 2007 and a Diploma from RCS Eng. in 2008.

Appointed a Director in the Scottish Centre for Excellence in Dentistry in 2014 Scot has exclusively placed implants for over ten years and is the longest serving clinical supervisor on the SmileTube programme. He has mentored in excess of 20 dental clinicians helping them achieve their goals in implant dentistry.

To find out how YOU can benefit from SmileTube visit: www.SmileTube.tv or call our Learning Community Facilitator on 028 9252 8522 or 077 4260 9686: email: Janine@SmileTube.tv

Our network of clinical centres is constantly growing as more and more Nobel Biocare mentors join the team. Each new centre further facilitates convenient local mentoring. Each centre is operated by highly-experienced implant clinicians.
